

Unit: Technological Design Process	Concept: Design Process Components
<p>Standard</p> <ul style="list-style-type: none"> 3.5.9-12.Y (ETS) Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering. 	
<p>Key Learning</p> <ul style="list-style-type: none"> (LTTG) Students will be able to analyze a problem in its entirety while recognizing the subcomponents interacting with human-made and natural environments. 	<p>Unit Essential Question</p> <ul style="list-style-type: none"> How can I analyze a problem in its entirety while recognizing the subcomponents interacting with human-made and natural environments?
<p>Essential Question</p> <ul style="list-style-type: none"> Why is there no single correct solution in design? 	
<p>Key Vocabulary</p> <ul style="list-style-type: none"> Engineering, Systematically, and Priority 	
<p>Learning Experience</p> <ul style="list-style-type: none"> Students who demonstrate understanding can design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering. Clarifying Statement: Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. 	
<p>(Big Idea) Technology & Engineering Curriculum Framework Big Ideas</p> <ul style="list-style-type: none"> There is no single, best solution as designs can always be improved and refined. 	
<p>(SEP) Science and Engineering Practices</p> <ul style="list-style-type: none"> Constructing Explanations and Designing Solutions - Design, evaluate, and/or refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, prioritized criteria, and trade-off considerations. 	
<p>(DCI) Disciplinary Core Ideas</p> <ul style="list-style-type: none"> ETS1.C: Optimizing the Design Solution - Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. 	
<p>(TEP) Technology and Engineering Practices</p> <ul style="list-style-type: none"> Systems Thinking - Designs and troubleshoots technological systems in ways that consider the multiple components of the system. Making & Doing - Demonstrates the ability to regulate and improve making and doing skills. 	

Terms

- (ETS) Engineering, Technology, and Applications of Science – Standards applicable across the Science, Environmental Literacy & Sustainability, and Technology & Engineering content areas.
- (LTTG) PDE Technology & Engineering Long Term Transfer Goals
- (Learning Experience) A learning experience refers to any interaction, activity, or other experience in which students acquire new understanding, knowledge, behaviors, or skills.
- (Big Idea #) PDE Technology & Engineering Curriculum Framework Big Ideas
- (SEP) PDE Science and Engineering Practices
- (DCI) PDE Disciplinary Core Ideas
- (TEP) PDE Technology and Engineering Practices
